Mokena Girl Leads In Contest to Date

All contestants are fighting for first place and with additional effort we will have a battle on for the first position next week.

The News-Bulletin is very anxious for the candidates in this district to stand in the first group each week and keep it up and finish on top. The News-Bulletin candidates have started the contestants in the other districts to work night and day and with this spirit we expect a grand finish with the votes running very close. Let us keep up the good work and show up the other districts.

Just imagine the wonderful prizes we are giving away. A wonderful Overland Coach is the capital prize, and the first prize for this district is a parlor suite valued very highly. Second prize will be a Radiola which will be a pleasure to win. Our third prize is a high class wrist watch.

All these prizes can be won by this district if the contestants will work hard every minute. Don't miss a chance to get more votes. The next three weeks are the banner weeks and we hope the people of our communities will help the contestants win these valuable prizes by giving them their support and co-operation.

The contest closes on Saturday night Sept. 26 and the prizes will be given out on Sunday Sept. 27 on the grounds of the Rock Creek Country Club located five miles from Joliet on the Troy road. Just follow the signs from Joliet which will direct you to the place. 5000 people will be on the grounds that day and there will be fun and entertainment for all.

Every body is invited to come and see the winners of the contest and have a good time.

Anyone wishing to enter the contest now will have a good chance to win, so send in your name to the Editor and we will get you started.

Orland Pastor Accepts Call of University of Va.

Rev. Myron S. Collins, who has been pastor of the Orland Park Methodist Episcopal church since last October, has accepted a fine position at Morgantown, West Virginia and leaves with his family next Wednesday. Mr. Collins will be University Pastor for the Methodist church at the University of West Virginia and Director of the Wesley Foundation, which has charge of social and religious activities among the Methodist students. Of the more than 2,000 students at the University, over one-third of them belong to the M. E. Church.

The church at Orland has been making good progress the past year under the leadership of Rev. Collins. Some of the things which he has done are: started the Sunday evening service again and built up a good attendance at it; secured a library of 1,000 books for the use of the community; installed a motion picture machine so that good wholesome amusement might be made available in the town and religious pictures used to illustrate the Sunday evening sermon; he was instrumental in organizing the Southwest Suburban Leadership Training School which was held for eight Wednesday evenings last spring and he was also dean of the school; he was also instrumental in securing the enforcement of the prohibition law in Orland. The people of the church have given splendid support and cooperation in the various undertakings.

Mrs. Collins has been teacher of the Adult Bible Class, taught a class in the Leadership training school, and attended to numerous details of the church work while Mr. Collins has been completing his University and Seminary work this year.

ENJOY PICNIC

Lucille Fisher, Gertrude Sippel, Bernice and Huerta Muehler and Angelina Hommerding enjoyed a picnic in the woods last Thursday.

STANDING OF CANDIDATES IN GREAT CONTEST OF MOKENA NEWS-BULLETIN, MOKENA—THE COMMONWEALTH, JOLIET—ENTERPRISE, PLAINFIELD

1- Esther Hellmuth.....	Mokena	306,000 votes
2- Clara Janke	Joliet	300,000 votes
3- Bertha Obsitnik	Joliet	290,000 votes
4- Irene Costello	Joliet	280,000 votes
5-Constance Smeatham	Oak Lawn	260,000 votes
6- Edna Weidner	Oak Lawn	260,000 votes
7- Marcella Eichler	Oak Lawn	260,000 votes
8- Rosella Worst	Plainfield	250,000 votes
9- Agnes Hohenwater	Joliet	250,000 votes
10- Genevieve Miklic	Joliet	250,000 votes
11-Floyd Hensel	Plainfield	225,000 votes
12-Antonia Madronich	Joliet	200,000 votes
13-Lucille Lindblad	Joliet	200,000 votes

An Open Letter From Former Orland Principal

(The following letter from Miss Dorothy Davis, former principal of the Orland High School, regarding the status of the Orland school and certain facts pertaining to a charge made in the faculty staff by the school board, is printed without comment, as we feel, it is best to let the public be the judge.

Editor's Note.)
7147 Princeton Ave.,
Chicago, Ill.
Aug. 1925

Editor News-Bulletin
Mokena, Ill.
Dear Sir:

An article which appeared in your paper on June 5, 1925 has just been brought to my notice and I wish to call your attention to several errors in the article which I feel must be corrected in your next issue.

The article gives the impression that I was trying to force the School Directors to rehire me for 1925-1926, as Principal of the Orland High School. That is a mistake I had no intention of returning again to Orland where I had been for five years, its first and only principal. The only reason I had for remaining there so long was that I was engaged in a movement—that of establishing, equipping and having accredited a two-year high school for Cook County.

I told the Board that I had not planned to return, and made no efforts whatsoever, to coerce them into rehiring me for the present year, as your article states. It is quite true however, that a petition asking the Board to rehire me was circulated and that every high school parent who was approached, signed it gladly; but I had nothing whatsoever to do with the origin of the petition or with its circulation. That was originated and carried on by the high school parents and the two ministers of the town who wished to give a copy of it to me as an evidence of their good will and their wish that I return.

The Board informed me that it had been unanimously decided that a man be principal the coming year and cited as examples of lack of discipline the prints of a basket ball on the ceilings of the rooms and that the high school students had rapped at the door of the grammar school. Both things are quite true. The prints are there, and the raps, I am told, were heard.

I was informed also, that the grammar school teachers had reported to the Board that I had not cooperated with them. Below the petition was a signed statement from every teacher in the school contradicting such a report. You kindly published the petition with the statement.

The Board told me too that they felt that a man was necessary for the school, as it was probable that only one teacher could be employed to teach both years of high school work, for they were doubtful that there would be enrolled the necessary number of pupils required in order to have funds enough to pay two teachers.

I explained to them that if such a course were pursued, they would be in danger of losing all the credit which has been built up in the five difficult years I had spent maintaining it. I could not appreciate their fear that there would be a shortage of pupils, for you may be interested in knowing that when I came to Orland, recommended by the University of Chicago, I started the High School in the one small room on the second floor of the Village Hall, with thirteen pupils of various ages, one long wooden table, and thirteen chairs of various descriptions and strength.

An Appeal to Fair Minded Citizens

BY ANDREW J. LANE

In view of the many unjust statements which have been made against the struggle to establish a TOWNSITE for the Negro people, I should like to take this opportunity to let the public know the true facts concerning our efforts and undertaking in that direction.

Believing that we Negro citizens have been made an object of exploitation, and having been forced to contribute to the support of a local government which sanctions any act that tends to deny us our individual rights in the enjoyment of life, liberty, freedom of worship and the pursuit of happiness, we have come to the conclusion that our salvation lies in our own efforts.

We realize that no person can have the same interest in us, that we should have in ourselves.

Therefore, with all this in mind we are establishing the town of Liberia, Illinois, as a monument to the industrious and ambitious Negro who is willing to work for the benefit of his own future, and give him the opportunity to provide for his children and posterity, a foundation that will encourage them to aspire for the highest ideals in life.

To allow, and thereby encourage our oppressors to continue to act for us any longer will only weld the links of the chain of semi servitude stronger.

You will admit that to crush a man's ambitions, all that is necessary is to successfully block his plans. Perhaps that is the intention of those who are antagonistic to our plans.

It is a known fact that people live to a great extent in terms of their environment. Do you think that the Negro has had environment that you would consider the best to make for better citizenship? No sane man would dare say no.

Other men have built up beautiful towns or the enjoyment of their people, why should we not have the same ambition and desires?

(To be continued in next issue)

Hurt In Auto Crash

While Clarence Piper, who is employed by the Standard Oil Co., in Chicago Heights, was driving to work Monday morning about 5:30 Mrs. Fried Hinspeter and daughter Lucille were at the same time driving to Mokena to take a train to Chicago, when the two cars collided at the school house corner north of the Hinspeter place. Neither driver saw the other car until too late to stop.

Mrs. Hinspeter and daughter were also shaken up and injured. She claims she looked both ways when she came to the cross roads and did not see any car and when she went ahead the Piper car hit her auto.

Mr. Piper was badly hurt and was removed to Silver Cross hospital in an ambulance. He was on the operating table there for three hours. His elbows were skinned and his hip out of joint. He is doing fairly well altho it is thought he will be in the hospital for sometime. Mrs. Emil Fink, a cousin of Mr. Piper who was riding with him to return to her home in Chicago Heights, escaped injury, but was badly shaken up. The Piper car is completely wrecked and the Hinspeter car slightly damaged.

I almost neglected to include one explosive stove. Our two other places of residence were also unique. Thru no small effort on my part, we finally moved into the present building. All high school equipment likewise, I have purchased.

(continued on page 4)

Oak Lawn Home Coming Big Affair

Big gala event last Saturday and Sunday when the Oak Lawn community club had their annual picnic on the Oak Lawn ball field.

The Michigan Radio was awarded to Alvin Piper of Piper's Garage. Mr. Frank Harnew won the prize for being the oldest settler in this community. Mr. Harnew has lived here for the past forty-eight years. Mrs. Frank J. O'Brien won the prize for being the most popular lady on the grounds.

Master Lowell Schultz won the tricycle. Miss Margaret Kenaly, the camera.

A baby contest was held and Ruth Adelle Hopkins, the daughter of Mr. and Mrs. Herbert Hopkins, won the prize for being the youngest baby.

The married ladies had a chance to show how fast they could run, also the smaller children had their races. Small prizes were given away to the winners.

When the picnic opened Sunday, the small folks had a parade, with floats and each child was to represent some thing. The little Verhyden children, Joan, Jacqueline and Denise, represented French Prince and Princess of Louis the Fourteenth reign. Their customs were original and stunning to gaze upon.

About \$350.00 were cleared and the officers of the Community Club wish to thank those who so willingly helped them. And as usual, our Mayor, John T. Emery, was auctioneer. Every one present said the picnic this year was the best.

A surprise party was given at the home of Mrs. F. J. O'Brien in honor of their son, Fred. All the younger members of Oak Lawn were present. Ask anyone there, for their opinion of the good time.

Last Friday evening a Baby party was given by the Colotho Club of Palos. Oak Lawn was well represented by the Misses Reba and Dorothy.

Thor Olson, Phyllis Jensen, Pearl Newmer, Messers Ralph Peltier, Louis Priller and Arthur Eichler.

Mrs. Maryanne Elvidge is the guest of her son, E. E. Elvidge of Oak Lawn.

Mrs. Albert Hageman and baby were the guests of the former's mother, Mrs. Minnie Schmidt, for the past week.

The Misses Reba and Dorothy Elvidge went to Litchfield over the week end and met some friends and relatives, then went on an excursion trip down the Mississippi River.

Mrs. John Bushfield and daughter, Maryanne, have returned from a week's vacation spent in Chambersburg, Illinois, with Mr. Bushfield's parents.

The H. A. Bruce vaudeville show was in town Monday and showed at 95th and Cook Ave. They had a large attendance and high class vaudeville was heard.

The construction work at 79th street is gaining rapidly. It is expected that in the near future 79th street will be opened from Lake Michigan to Aurora, Ill.

The culverts at 95th street and Cicero Ave., have been completed and the widening and concreting between 87th and 95th streets is nearing completion under the able supervision of James McCarthy, one of the State's Engineers. Mr. Orr of Chicago Heights being the contractor.

Mr. Paul Kessler of Oak Lawn, our Aviator, better known as the Sky Pilot is spending a few days in Elkhart, Indiana, with his new plane of his own construction. We sincerely hope that he returns O. K.

Our Camp Fire Girls with Miss Ruth Utt as Chaperon have been vacationing at the Community Camp at South Haven, Michigan.

Mr. and Mrs. McRoberts were guests of Mr. and Mrs. Leo Stevens over the week end.

Mr. and Mrs. Nurborg of the Wedgwood Hotel, Chicago were guests of Mr. and Mrs. Cyrus Freed over the week end.

Trustee Montgomery was trying out his new steed at the Community picnic Sunday. When someone asked why he did not get off and give his horse a ride, as he was so much larger than his steed.

The Oak Lawn Chamber of Commerce will meet and have a dinner on September 10th at which time they expect some sixty business men from Evergreen Park, Chicago Ridge, Worth and Palos.

After which they will close the charter. A good time is assured for all. If you are not a member be present and join in with them.

Mr. Fred Bartley of Decatur, Illinois is in Oak Lawn and Chicago Ridge attending to some special work for the Wabash railroad.

Trustee William Schultz has just returned to work after a confinement due to his injured limb.

Mr. Joseph Exter is improving rapidly. Keep it up Joe we hope to see you home soon.

We are looking forward to some crossing improvements on the Wabash. When may we expect this Emery?

We are pleased to note that taps are being taken to stop the drainage of cesspools and other sewerage into our open drains. The County and State Health Departments are going to make a rigid inspection so you had better look after your drains and get out from under.

The new Elmore Subdivision is nearing completion of sidewalks and streets. If you have any loose dollars now is the time to buy for future profits.

The cement work is being done by the Weigel Construction Co., of Chicago. Mr. John Schulz of Oak Lawn is doing the road construction work.

Mr. and Mrs. Walter Montgomery have returned from a trip to Canada.

Mr. and Mrs. Geo. Dutton spent the week end in Chicago, with friends.

Glad to see Daniel Early out again, following a recent operation.

It is gratifying to note the efficient work being done by our Judges and Police department.

Wiley Simmons, former principal of the Grammar school is back in town again with his wife, Mr. Simmons will be principal of the old John Krueger school at 64th and 95th street. Good luck to you old friend.

The Black Oak A. C. of Oak Lawn has had a very successful season in baseball. They have gone thru the season without a single defeat. They have defeated Chicago Ridge and Worth and several teams from the City.

The pitching is done by Behrend who performs brilliantly in the box and is one of the leading batters. Among his victories are found a one and a two hit game. Maskell, our catcher and manager is one of the leading sluggers and without him the team could not have chalked up so many victories.

The infield is composed of Wintner 1st base, Mullen 2nd, Exter 3rd, and Harnew as short. All these players hold their position well. Harnew plays his position with skill and that bodes evil for any batter who happens to hit a ball near him.

The outfield is composed of Elvidge, left field, Brockhaus center, and Smith right. Elvidge has played wonderful ball in every game holding the crowds silent with many sensational catches.

Palos Woman Makes High Golf Score at Southmoor

Golf circles in the Palos region are much elated at the excellent showing made by the Woman's Auxiliary at Southmoor, Aug. 22, when Mrs. S. Y. Patterson broke the record with a score of 49 to 52 in 18 holes. Her opponent was Mrs. H. F. Ewert. Mrs. Patterson was awarded a silver service as a prize.

Mrs. Ewert was awarded a silver pitcher for the runner up prize. The match ended with one up.

This was considered an excellent play and has created much interest.

The Palos Park Woman's Club was entertained by Mrs. George B. Ward at a lawn party at her home on 123rd street, Friday afternoon. A feature was a wood nymphs dance participated in by Misses Emma Kately, Dorothy Ely, June Smith, Miss Rose Sweeney sang.

The annual Palos Park Flower Show will be held September 15th at the Palos Park club house. Mrs. S. Y. Patterson will be in charge as chairman. The Flower Show is one of the big annual events of Palos and some very beautiful blooms are shown each year.

In connection with the floral show there will be an Art Exhibit of which Claud Buck will be the chairman. Mrs. Buck in charge of the decorations. In addition a rug exhibit at which hand made rugs made in this country, will be shown. The exhibits will be shown all day followed in the evening by an entertainment and supper.

Mrs. Marie Brenner entertained a number of friends at an all day party at Starved Rock, Monday. MRS. McCASKEY WILL

REPRESENT NEWS-BULLETIN
Palos Park residents have felt the need of a community paper for sometime and as The News-Bulletin has been entering Palos and other Southwest Towns, this paper will be a great asset to Palos Park with its community news. We have been very fortunate in getting Mrs. Ruby McCaskey to represent The News-Bulletin at Palos. She has had considerable experience in newspaper work, her father being an editor.

All items of news, etc., can be given to Mrs. McCaskey either by phoning her at 69-M1 or by sending the items to her, by mail or by giving them to her in person. We aim to make our Palos Department an interesting feature.

MOKENA MAN SHOOT'S SELF;
IN HOSPITAL AND IMPROVED
(While in a despondent mood, C. E. Haney of Mokena shot himself in the side Sunday morning in his garage. His children heard the shot and got help at once. He was taken to Silver Cross hospital and is recovering.)

The lineup is as follows: Elvidge, Maskell, Wintner, Behrend, Harnew, Exter, Mullen, Brockhaus and Smith.

YOUR FRIEND IS OUR BANK

THE Bank is the backbone of the country—and must be effective in dealing with people of the country. The bank is a Service—for you. Whatever your problems—what ever needs are yours—that is when you come to your Friend, the Bank. This bank is ready and waiting for you—loans, advice, trust department, wills, savings—all this is included in our service to you.

CHAPTER XVII—Continued

-14-

She did not talk to him as he fixed the car, nor when, having looked back along the slight cut of the old prehistoric torrent bed now filled almost to its old banks with drifting sands, he squatted over a map, measuring and consulting a pocket compass. His anxiety was evident.

They went forward again, however, under the full light of day into a trackless waste where there was not even a depression to guide them and where Brena, holding the compass in her hands, gave directions to him as he moved the wheel. At the end of twenty miles more Brena uttered an exclamation.

"What is that on the desert?" she asked. "Peter, look! There! To the left."

A little point of light shone on the sand as if a diamond had caught the sunlight and had extracted from it a bit of its essence to outshine the sun himself. Peter, steering toward it, looked down over the edge of the car as one might look over the edge of a boat at some piece of strange flotsam sighted in midocean. This was strange flotsam indeed. Peter having stopped the car again to pick it up, showed it to Brena; it was an empty vial of white glass.

Peter sprang out of the car, and, walking about in widening circles, searched the ground. He appeared excited. Time and time again he looked at the little glass vial.

"Some one has been here," said Brena. "I'm just Irish enough to say that, Peter."

"Hush," he said. "I've seen more than you have seen. It means everything to us!"

He bent over her as if he were going to take her in his arms, but he tossed his head at some thought that had restrained him, and took the wheel once more.

At nine o'clock they came within sight of a great mound on the desert; it appeared as if it were the fat round back of some gigantic creature that had buried itself for a sleep of centuries in a sand wallow of vast area.

"There it is!" exclaimed DeWolfe. "Look, Brena. Look to the west. Somewhere up there is the Llano Estacado—the Staked plain—as the Spanish explorers called it. And there's the haze on the horizon—the haze that the Jesuit missionaries told about. It comes from the colder air of the Mesquero ridge!"

"And it means that we have found our way?"

"Yes, found our way. There's ninety miles more."

"Where are we going?"

"To the oldest city, Brena, in America. To a city at the base of a high cliff, built of clay which crumbled centuries ago into dust. The wall is left perhaps as it was two centuries ago. A dry well. A carving upon the rock. A windless place occupied only by horned toads and perhaps one other misshapen thing."

At three o'clock they had stopped again to eat; they were able to see in the west the tops of distant mountains marked by a deeper, duller blue than the thin cloudless rotunda of the sky. An hour later they came within sight of the tableland upon which these mountains were set like piles of food upon a giant's doorstep. And this step up—this mesa—with its precipitous edge, marked the end of the desert.

"The cliffs that rise to that tableland are impassable," said Peter, with his eyes alight and his voice filled with excitement. "The city was built below their protection around a great well and walled in front with thick fortifications. We shall see them, Brena!"

He looked at the opening in the high wall as if it were the maw of Destiny opened to belch forth upon them a sentence.

"Tell me, Peter—are there dangers there? Do you know?"

"I only guess," he answered. "I think there are none. I think, Brena, that beyond that wall there is freedom for us—life for us—a message for us."

"I must go with you."

He nodded.

At the entrance he stopped, gazing down at the ground—the film, the blanket of fine dust. He uttered an exclamation.

"What do you see, Peter?"

"I see a record in the sand."

"What record?"

"We shall see more," he said grimly.

"Come."

Toward this memorial of tragedy, of death, of decay, of the insignificance of time, of the inconsequence of an age of man, Brena and Peter, like two creatures of a moment of life, walked with solemn, awed faces.

"Look!" said Peter suddenly. "Have you your nerve? Look!"

He pointed to a pile of charred bones lying close to the well. Among them was a piece of human skull blackened as if by fire.

"Wait," Peter commanded.

He went forward, bent over the ghastly pile, kicked the sand that surrounded it and, stooping down, gath-

ered a number of objects into the cup of his hand.

"This was no prehistoric man," he said solemnly. "See! The eyelets and the nails of shoes. The leather long ago vanished. Here are two mother of pearl buttons, a pocket knife, coins, the snap on a wallet. This man lost his life, Brena, many years ago."

She tried to speak, wetting her dry lips with the tip of her tongue.

"There are things of gold, too," said Peter. "Keep your nerve, dear. Look at this!"

He held out in his trembling fingers a signet ring with an H deeply engraved upon it.

"That!" exclaimed Brena with horror. "It was his!—Jim Hennepin's. This is—him?"

"Yes."

Brena moved toward the pile of bones half consumed by fire; then she stopped and looked away.

"He was killed," she said. "He was shot or stabbed."

"No," replied Peter grimly. "It was worse than that—more ghastly. He was killed. But it was not by human hand."

CHAPTER XVIII

"Brena, I want you to stand here by this old well without walking away from it a moment," said Peter, taking her by the shoulders and looking squarely into her dark eyes. "I'm going to leave you alone a minute. It's not pleasant. I want you to do it just the same."

"Where are you going?"

"Outside the wall again. I've seen something there that you did not see."

Brena shivered.

"Don't be afraid, dear," he said.

"We have had—both of us—the lesson of futile fear. Once we told each other that fear was a crime—a terrible waste. We are on the verge of learning how terrible a waste it can be."

She put her hands in his; with a smile she said, "You see, Peter, I am in the dark, dear. But just the same I'll do as you tell me."

As he walked away from her, his head bent forward as if meditating, she leaned back against the hot, flat face of one of the huge stone blocks of the well curb, following him with her steady gaze. He disappeared outside the old wall, and as he vanished, so vanished all that attached her to the living world. There was no sound, no motion within the range of the senses; the place of death was still.

From the tablelands above, a lonely buzzard had come swooping down on wide black wings, dipping and turning, with one eye cocked down, as if sometime before he had picked bones in this inclosure and had returned to the scene of gruesome feasts. Black, ill-omened, carrion creature that he was, Brena felt glad that he had come—a thing of life and motion—into this place of vast dimensions filled by the silences and rigidity of death. She

"It Is There—Here in the Sand—a Record," He Said. A Ghastly Record."

watched the magnificent grace and power of his flight until Peter's voice broke the silence again, and, flapping toward the west, the bird began to circle up whence he had come.

"Brena," said Peter, who came to her with an expression drawn as if with some stress within.

"Yes?"

"Sit down with me here where these blocks cast a shadow, dear. I will show you what I have found—a thing like the writing of a giant finger of justice—here in the desert. But first I want to tell you a tale, Brena—true, revolting and terrible."

"Tell me," she said, sitting with her elbows on her knees.

"It is of surprising brevity, Brena,"

he asserted. "Its simplicity is the thing that makes ridiculous the many things I expected, all the nightmares

of the unknown. I told you, dear, that I was no Master Mind—no Great Analyst in capital letters. I was right. I stumbled onto the trail. I used my head. That's all."

He stopped to think. "And yet the simplicity is hideous!" he said.

Brena glanced toward all that remained of Jim Hennepin of Virginia—the blackened fleshless relics of his existence.

"He deserved it, perhaps," said Peter pointing. "He tried to cash in his knowledge."

"You told me last night of the superstition of buried treasure here," she said. "You mean that?"

"No, not exactly," said Peter. "I picked up the trail in the house where Parmalee took you. Two old books; and maps of this country and of this place were missing from both. One Parmalee took when he went away. The other? Well, I began to wonder about the other."

"You thought it must have been used—before."

"Yes. It had been used and probably destroyed. It was used by one man to tell another to his death."

Brena leaned forward.

"I began to be sure, Brena, when I found that expert knowledge pronounced that the writing on a check made out by the one man who led the other to his death here was written by the same hand that, with an attempt to disguise, had written the words, 'This Sign,' on the scrap of paper Jim Hennepin left with you and that you gave me. I'd better tell you that when I first took that check it was because your indorsement was on it. I wasn't sure, Brena—of anybody."

"I understand," she said. "I understand. And the scrap of paper was a part of the bait?"

Peter raised his hand as if to say that he wished to go on in his own way. "It was chance too that led me to the motive for ridding the world of Hennepin. That miserable man had become a menace. He knew too much. He knew of a long series of embezzlements from a certain estate in Texas. A capitalist had bought vast quantities of something—on speculation—and his agent after his death deceived the executors as to the extent of his holdings. The man had been found with an account book stuffed to the bottom."

"And Jim Hennepin knew?"

"Knew and began a merciless blackmail, threatening ruin. I can see him now, insatiable, hungry, losing in speculation, asking for more, hounding a man who was balancing between success and failure and always hinting at bankruptcy and the penitentiary."

Peter went on. He told of the probability that Compton Parmalee, the hounded man, a physical coward, but resourceful and ingenious, had come upon an old volume describing this lost city of the desert. There were traditions of vast wealth hidden there. Parmalee had pretended to the possession of knowledge confirming it. He had shown old letters, the scrap of paper with the Kuk-ul-can symbol. He wanted to take the blackmail to a place from which he would never come back.

"To kill him?" asked Brena.

"No," replied Peter. "He hadn't the courage. He feared that. He feared the work. He feared the result. He had a better way."

"And how?" she asked.

"It is all there—here in the sand—a record," he said. "A ghastly record. Seven years have gone, but in this deep fine dust, Brena, there still remains the story."

He paused; he lit a cigarette; went on. He said, "There around the entrance are the marks of horses' hoofs—almost lost—but still readable—three horses, two saddled and one carrying the packs. They came in two horses abreast, and the pack horse led behind. Two men in the saddles. Night came on. One man slept. The other crept to the animals and he rode away."

"Rode away? Left Jim Hennepin here?"

"Yes, beyond hope—no horse, no water."

"How do you know?"

"Because, Brena, when the three horses went into the desert their footprints are in single file—one man led the other two. I will show you. It is in the sand—a record and a good guess."

He was silent and he broke his silence with a cry.

"I can see him—Hennepin—awakening, realizing, seeing far away the little galloping specks in the pale moonlight with the treacherous man upon the leader—a tiny bobbing figure. I can hear the curses hurled after them. And he—the one left—alone under the moon, alone under the sun, alone under the moon again—without a drop—rushing out into the desert, only to be driven back to the shade after weary marches dragging through the sand, hunting among the rocks, crazed with thirst, gone mad, cursing, blithering mad—his tongue black—the end—perhaps a thought of you—the cur!"

He looked up at Brena; he set his jaw.

"I'm sorry," he said. "But I can see it so clearly—the terrible retribution in this place of silence. His

screams echoing back from the rocks, his curses rising into this thin pale blue sky and the vultures swing overhead."

"Seven years ago," she whispered.

"Yes, seven years. And four years of torturing fear—that was the pay of the one who rode away."

"Compton Parmalee?"

She said it without any external sign of emotion.

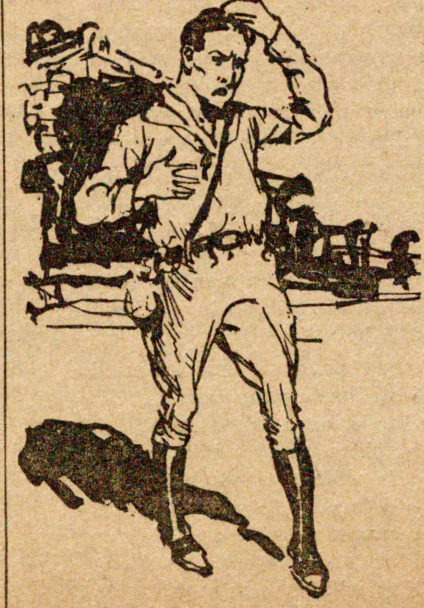

"Yes," said Peter. "He had succeeded in wiping out one blackmailer. But another, more terrible, sprang up—fear."

"He feared discovery?"

"Yes, and something else. He could never feel sure that Hennepin was dead. That was the curse upon him—the fear the murderer feels, twisting and alternating with the fear of a physical coward who ever hears those threats, those curses, those promises of vengeance coming across the moonlit desert as he rode away that night."

She shuddered.

"Yes," said Peter. "That was why Parmalee destroyed the map. He had probably ridden back to some other settlement after shooting Hennepin's

"I Can See Him—Hennepin—Awakening, Realizing."

horse in some gully and he wanted to wipe out all evidence. For months he resisted the temptation—that burned and scorched inside—to see you."

"To find out whether I had been told anything about Hennepin's destination? And then when he wasn't sure—when there was that scrap of paper not accounted for—! Peter, it is too horrible; he proposed that strange marriage agreement in order to go away and take me with him. He was afraid I might remember some word—give some clue."

"No," replied Peter. "It was that of course. But that was not all. The spark of real man that you saw in him was there, Brena. Terror put it out at last, but the real tragedy of Parmalee was that he had that redeeming spark."

He waited for her to look up again; she had been staring down at the yellow-gray dust.

"I suppose you can see," he went on. "I suppose you can see now what was in his mind. Two pictures. One was the picture of Jim Hennepin alive—that great muscular athlete who drank hard, who had the false traditions of the South, the love of death oaths, the degenerate temper, the sly smiling ways of carrying a vengeance through. He saw him escaping from the desert. Brena—heaven knows how—but escaping by some desperate effort, some chance, some miracle, some way that Parmalee's brain could not conceive, but yet couldn't be put out of range of possibility. He saw Hennepin seeking him. Yes, he saw it—a picture—a thousand haunting pictures—Hennepin with his malleable, desperate, haunting eyes and his terrible muscles. He saw him smelling along the trail for his quarry. He saw him walking about a quiet picture gallery, and, suddenly seeing your portrait and realizing that Parmalee had taken you, turn red with renewed wrath which would send him out for a knife."

"At last that imaginary Hennepin became almost a reality," said Brena.

"He shot at him once—at a reflection in a piece of glass. He kept Paul because Paul was a brute who would fight. He was afraid Hennepin would send some assassin to get employment as a servant. He never knew when Hennepin might come—and kill."

"But he saw the other picture too. He saw the buzzards hovering over what was left of Hennepin, he saw a whitened skeleton grinning up at the sunlit sky and at the stars, Brena. That's what he saw. And some day some one would somehow come there. Perhaps at the very minute a prospector, dirty and unshaven, or some accursed archeological explorer from a university was in that very town where they had bought the horses and was telling of the skeleton and of finding the skeleton of the riderless horse with the bit still held between the white teeth. He might have that bit in his pocket. Some one recognizes it. Somehow the chain once started never ends until—"

"There comes a hand upon the shoulder," said Brena, as if in a dream,

"and a voice saying, 'We have looked a long time for you.'"

"Yes. There wasn't one fear," Peter said, marking two lines in the sand with his forefinger. "There were two fears. They fought each other and their battleground was Parmalee's soul. It was trampled into a wallow of terror, of questioning, of doubt. Do you know, Brena, that somehow there creeps into me a great pity for him?"

"If he had been able to put his finger upon some button that would have blown him to bits he would have taken that way," she said. "But he had an exaggerated instinct for self-preservation. It threw him back from any approach to suicide."

Peter, getting up, came to her and put his hand upon her shoulder as if to give her strength. She had spoken with a voice too evenly measured to deceive him as to the strain she felt. It had been a long pull for her, he thought. The last steps, though they might lead out into the sunlight of freedom, were upon rough ground—rough even for a man. He was wondering how he could save her from pain. He wanted to have this surgery over, and to have it over there was only one way.

"It was inevitable that he would come here—in the end," he said. "He had to see. He had covered his terrors by a cowardly process of trying to make you believe that some mystery that clung to you was the cause of them. He began to fear disclosure. He feared that he would allow you to know in some mad moment. He was coming to the end of his rope."

"Yes, the end of his rope."

Peter stopped and looked up at the ugly symbol of Kuk-ul-can carved on the rocks.

"He procured a copy of Father Carlos' map a second time," he said. "He had to have it to find the way. After four terrible years he revisited the Pueblo Mesquero, two hundred miles from nowhere. It called him back. He had to come."

He stopped again, looking at Brena, whose palms were pressed against her knees, whose face with its wonderful profile was still held uplifted looking into the vast distances of the desert, her lips closed, her eyes unseeing like some carved deity who had been sitting thus for centuries.

"He bought a high-powered car, Brena," said Peter. "And all alone he came."

"And where is he now?" she cried out at last, in sudden disclosure of her pain. "Do you know? Where is he now?"

She looked searchingly at Peter's sun-bronzed face, where upon the surface of youth lines of strength had been engraved by war, and lines of tenderness perhaps by a great new understanding of love and life.

"He is here again," he answered. "He is here. . . . Do you understand?"

CHAPTER XIX

"I understand," said Brena.

"Then come with me," Peter said, holding out his hands. "I will show you all that remains—the record—the story written on the sand and dust."

He led her again toward the charred bones; he found no resistance in her.

"Look there, Brena. Do you see the footprints? Here are yours and mine. But look again on the sand. There are others, too. A thin veil of dust is over them. They move here and there; they criss-cross and move away. They are the footprints of Compton Parmalee. He has come to stand gazing down at the white skeleton—white as oyster shells."

"Blackened," she said.

"Wait!" Peter said. "There are the spots where he stood looking down. He had his answer; no living Jim Hennepin of Virginia would ever fill him with lead. And as he stood, Brena, perhaps gazing down for a long, long time—because his footsteps are lost in that stew of impressions—he was filled with all the concentrated terror that I suppose only a murderer can know. He went into a crazy wild panic of fear. These bones were his—the grinning skull. They must be hidden."

"How do you know all this?"

"Because he has moved toward this old well. He reached the stone well curb. He sprang up. Do you see the marks? He found the mouth choked with massive blocks. Nothing could be hidden there! His track moved back."

"Go on," said Brena.

(TO BE CONTINUED.)

Dangers to Gems

As pearls consist of carbonate of lime, vinegar and other acids will eat away the polished surface in a short time. Hot water is fatal to an opal destroying its fire and sometimes causing it to crack. Soap is a deadly enemy of the turquoise. If a turquoise ring is kept on the hand while washing, in a short time the blue stone will turn to a dingy green.—Popular Mechanics Magazine.

Elephants of Africa do tremendous damage to native farms.

SOME MIDDLE-AGED WOMEN ARE AILING ALL THE TIME

Mrs. Ackerman and Mrs. Mayer Tell Women How Lydia E. Pinkham's Vegetable Compound Helped Them at This Trying Period

MRS. ELSIE ACKERMAN
CONVOY, OHIO

Convey, Ohio.—"During the Change of Life I was weak and run-down and could hardly do my work. By reading your advertisements I found out about Lydia E. Pinkham's Vegetable Compound and it has straightened me right out and made me feel like a new woman. By the time I had taken eight bottles I was well and could do my housework on the farm without trouble. I recommended it to my daughter-in-law after her second baby was born and it did her a wonderful lot of good. I told her to try it and if it didn't help her I would pay for

it, and before she had taken one bottle she said to me, 'You won't have to pay for it! It is helping me wonderfully!' And she took three bottles of it. You can use my testimonial if you wish."—Mrs. ELSIE ACKERMAN, Convey, Ohio.

Mrs. Mayer's Experience

Litchfield, Conn.—"I have given your medicine a fair trial (I am on my fifth bottle) and can truthfully say that it has helped me. I am at the Change of Life and was not able to sleep nights, had indigestion, palpitation of the heart, pains in my right and left sides (more so if I hurried), had a rapid beating in my left ear and dreaded to see night come. I felt smothered if I lay on my left side, I had gas dreadfully, at times felt as if some one had me by the throat, had hot waves through me and sometimes I would shake in spells of nervousness. I am taking Lydia E. Pinkham's Vegetable Compound and I cannot praise it enough. I can say it does all it claims to do and I can recommend it to my friends. I can sleep much better, the pains in my sides are gone, I am not so nervous, my digestion is much better, and I very seldom have the hot waves. I must say that the Vegetable Compound is the best medicine for women's ills and I will answer letters from women asking about it."—Mrs. JOSEPH MAYER, SR., Box 36, Litchfield, Connecticut.

He Owes His 40 Years of Constant Good Health to Beecham's Pills

"I am 57 years old and commenced to be troubled with constipation when I was sixteen. "In 1884 I started taking Beecham's Pills other remedies having failed. I have not had a sick day in all the 40 years."

RADIO

By PERCY WARREN, in Radio World.

We all know that a set which is built of expensive materials works very well and is recommended by all experts, but suppose that we haven't the money to purchase the best new parts? By that I do not mean that we mustn't use materials efficient electrically and still expect to get very good results. What I mean is that we can build our own coil at a very small cost and still obtain efficiency.

Of all the sets that give distance and volume there is not one that excels the simple regenerative type. There are many types of regenerative sets, the single circuit, the double circuit and finally the triple circuit. There was even a four-circuit set, with several controls. Of all four types there is no one more popular than the three-circuit tuner. This circuit deserves its popularity because it is selective and gives volume.

The set that I am going to describe is of the three-circuit variety and is a world-beater for volume and distance, even though the inexperienced person can build it.

Construction of the Coil.

The first thing that you want to do before you build this set is to read every piece of data that refers to the successful operation of the receiver. You have probably read the information already. After doing this we are all set to build the coil, which is very simple, but with which a great deal of care should be taken.

Procure a form about four inches in length, three inches in diameter. We will wind the grid coil first, starting about one-fourth of an inch from one end of the form. Before doing this, better drill two holes about three-sixteenths of an inch in diameter and about one-half of an inch away from each other for anchorage. Put binding posts here and mark one G and one F plus. Now drill two holes exactly as the ones drilled on the other end

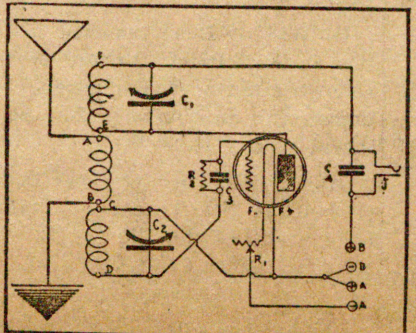

Diagram Showing Circuit of Tuned Plate Regenerative Set

of the form. Put two binding posts here and mark posts P and B plus. On this same side about two inches away drill two more holes of the same dimensions as the four others. The beginning of the grid coil winding goes to a post marked G and lettered as D on the diagram. Continue winding 50 turns of No. 22 single cotton-covered wire and put the end of the coil to the post marked A plus. Leave half an inch and put the beginning of this new winding to the post marked GR. (B in diagram). Continue winding until 10 turns have been completed, connecting the end to the post marked A plus. (C in diagram). Leave one-fourth inch now and place the beginning of the wire to the post marked P (E in diagram). Continue winding until 35 turns have been made, connecting the end of the wire to the last post, which is marked B plus. (F in diagram). Make sure that all the windings are in the same direction and that all the posts as designated.

Panel Instructions.

Lay aside the coil and take the panel. There are two controls on the front, besides the rheostat, which should be of the 6-ohm type for WD-11 or 12 tube. The panel is 7 by 10 inches and is of hard rubber, which is more efficient for radio than the beautiful-looking bakelite panel. Drill a hole for the variable condenser. 2-5/8 inches away from the end and 3 1/4 inches from the top of the panel. The templates for the condensers are in the cartoons. The condenser is the only article which costs any "real money."

The dials are three inches in diameter. The same dimensions apply to the other variable condenser when drilling the holes. For the rheostat drill 1 1/4 inches from the bottom and 4 inches from the end. The other dimensions are given with the rheostat. That is all the drilling that goes on the front of the panel, except the baseboard holes, which are determined by the size of the board that you have (usually an inch-thick board about six inches in length, and having about three holes evenly spaced, 3-1/3 inches space). On the board mount the coil between the two condensers. Don't squeeze it in.

Assembly Directions.

At the extreme end of the board place the terminal strip (the strip which consists of the battery binding posts and the antenna and ground posts). Directly in back of the coil put the socket. If you deem a jack too expensive a pair of binding posts may be put on the terminal strip or on the panel and the tips of the phones put there.

The other materials include C4, .001 mfd., fixed condenser; C3, .00025 mfd. fixed; R2, two or three megohm grid leak.

Now for the wiring of the set. Connect the post marked A in diagram and on coil to the antenna and the

post marked GR to the ground. The F plus (C in diagram) goes to the positive post of the socket and to the plus post of the A battery, which is connected to B minus. The terminal marked G on coil goes to one side of the grid condenser and to the grid leak. The other end of the grid condenser goes to the grid post of the socket. The terminal marked P (in diagram E) goes to the plate post of the socket. The last terminal marked B plus (in diagram F) goes to one end of the .001 condenser, whose other end goes to the B plus. Across the terminals of both the plate and the grid coils connect two .0005 variable condensers, making sure that the rotor plates of the grid condenser go to the A plus and the rotor plates of the condenser which is shunted across the plate coil to the B plus side of the plate coil. All this wiring should be done with No. 18 bell wire or rubber-covered telephone wire. Avoid bus bar. That completes the wiring of the set.

Aerial Advice.

Your antenna should be at least 75 feet in length, well soldered, and your lead-in should be put about one foot away from the wall, well insulated. Your ground should be as short as possible and should consist of No. 14 rubber-covered wire. The antenna wire should be No. 14 hard-drawn copper wire. The aerial should be at least 20 feet above the level of the ground and at least 10 feet above the level of the roof. But if you have a tin roof, place the antenna as high as 25 feet, which must be done in order to get away from the good grounding qualities of the tin.

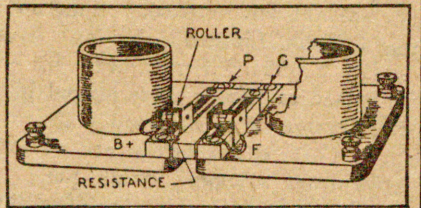

Trouble Hints.

If you are getting noisy reception first push up the prongs of your tube socket, clean the terminals at the end of the tube with sandpaper and test your B battery with a pair of phones. If, when you put the phones across the battery, you hear a lot of rushing noise you can be sure that the battery is no good. Test your by-pass condenser, which is the condenser having a capacity of .001 mfd., as this is often shorted.

Variable Resistances to Take Up Little Room

No two sets operate on the same value of resistance when using the resistance-coupled type of audio-frequency amplification. The resistance should be adapted to the characteristics of the tubes used, the aging of the tubes, and the changing voltage of the B battery.

Variable resistance may be made so as to occupy very little room. Nearly all commercially made variable resistances are so made that it is awkward to mount them. The diagram indicates a room-saving method. Use a base of hard rubber or bakelite 2 by 1 1/4 by 3-1/8 inches, which is slit in two places about three-fourths of the length of the block. The resistance element is made by dipping a strip of cardboard in waterproof India ink. The resistances are usually arranged in pairs, one of the resistances making contact with

Leads Eliminated and Efficiency of Set Is Increased.

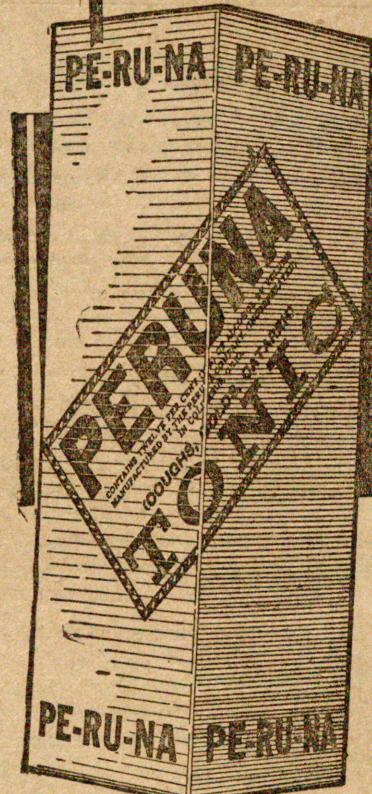

the plate and B plus supply, the other making a connection from the grid of the amplifying tube to the filament. Sliders are made from sheet brass and electrically connected to the contacts at one end of the resistance by a soldered flexible wire. Be sure that the flexible wires are well insulated. Roller contacts on the India ink resistance insure that the ink will not be scraped off or injured. These rollers are made by mounting about four of the ordinary spacing washers, from commercial variable condensers, on a one-eighth-inch brass bar. Be certain that the pressure of the rollers on the resistance strip is firm and secure.

The figure shows how this unit may be placed between two tube sockets in such a manner as to conserve space, and save wiring all but one lead (to the B plus supply). Long binding post bolts are substituted for the short ones usually found in commercial tube sockets, and the variable resistance unit and the fixed condenser are bound to the socket terminals with the same bolts.—Radio News.

Emery Cloth to Clean Your Rheostat Contacts

Grating and sizzling noises heard in the loud speaker or phones are sometimes due to a defective rheostat contact. Remember that there are two sliding contacts in every wire-wound rheostat. There is one between the contact finger and the resistance wire; and the other is between the rotating shaft and the spring which is connected to the terminal. It is easy enough to test the pressure of the contact on the resistance wire, but the other sliding contact may have become weak or dirty. The remedy for this condition in most forms of rheostats is to take them apart and increase the tension of the spring after cleaning the contact surfaces with emery cloth.

The Old Standby in a New Dress

The New Package

Send 4 Cents for booklet on catarrh to the Pe-Ru-Na Company, Columbus, Ohio

—the same dependable remedy that over a period of more than fifty years has been found so reliable in the treatment of catarrh and diseases of catarrhal nature.

The outside of the package only has been altered. To facilitate packing and reduce breakage in shipping, the paper wrapper which has identified the Pe-Ru-Na bottle for many years has been displaced by a substantial pasteboard carton.

Pe-Ru-Na cannot be made any better. Three generations of users testify that Pe-Ru-Na is the best remedy in the world for catarrh and diseases of catarrhal origin.

The remedy our fathers and grandfathers used with so much satisfaction is still the standby for the ills of everyday in thousands of American homes.

Exchange Your Old Rugs, Carpets and Clothing for Up-to-date Rugs of New Wool—Save Half SHIPPED TO YOU WITHIN 24 HOURS

SAVE half on Rugs! Beautify your home at trifling cost! Our beautiful new book, "Rugs and Home Decorating," tells how. This is an unusual book—printed in actual colors—full of useful and money-saving suggestions. Be sure to write for a Free copy today.

This book tells about an unusual merchandising plan that has put Olson Rugs within the reach of hundreds of thousands of home lovers by cutting rug costs as high as 50%.

Olson Rugs are rich and luxurious—made of fine, imported new wools. Every step in their manufacture is performed here in our Chicago mills—the largest in the world selling direct to the home. They are woven in one piece (no seams) with the same deep, luxurious nap on both sides, to give double wear. They are made in any size and any color in the one and two-toned effects now endorsed by leading decorators.

SENT ON TRIAL

Your old rugs, carpets and clothing pay part of the cost of new Olson Rugs. That's what brings the price down so low. We pay shipping charges on your old material and send your new rug for a week's full trial. You can't lose a penny. Our iron-clad guarantee protects you fully.

RUGS IN 24 HOURS

We ship your new rugs the same day we receive your order. In other words, these new, up-to-date, reversible Olson Rugs are in your home within 2 or 3 days from the time you order them! No delays! And, best of all, a

cash saving of as high as 50%! Get all the facts. Mail coupon today for free book that explains everything.

AILEEN PRINGLE

Famous Goldwyn star and society woman says: "I love beautiful things. I guess that's why I'm so partial to Olson Rugs. The colors are rich and restful. The deep, luxurious nap makes them ideal for any room in the home."

TEAR OUT AND MAIL

Olson Rug Co., Dept. W-1, Ladin St., Chicago, Ill. Gentlemen: Please send me, FREE, at once, your latest book on "Rugs and Home Decorating," which explains your money-saving plan that allows me to exchange my old carpets, rugs and clothing for up-to-date new rugs. This obligates me in no way.

NAME ADDRESS (R. F. D.) TOWN STATE

MOKENA

The reunion of the Rix family was held at the Cappel Grove on Sunday August 30. There were 70 members present. Games and sports were greatly enjoyed by all. Those present were: Mr. and Mrs. Geo. Barnes and daughter, Henry Barnes and son Roy of Mokena, Mr. and Mrs. Elmer Bartlett of Frankfort, Miss Nina Bartlett of Silver Cross hospital, Mr. and Mrs. Fred Woodman and daughter, Mr. and Mrs. Frank Morris and son Merle, Mr. and Mrs. Lawrence White and family, Mrs. Thomas Jex, Mr. and Mrs. John Cooke, Mr. and Mrs. C. D. Johnston and family, Mr. and Mrs. Herbert Pierce and family, Mr. and Mrs. Will Jex and daughter, Mr. and Mrs. Richard Larking and family, Mr. and Mrs. Jas. Larking and family, Mr. and Mrs. Ray French and baby, Mr. and Mrs. Herbert Etheridge and family, Mrs. Geo. French and family and Harold Barnes of Joliet.

Mrs. Geo. Barnes entertained the following guests Thursday Aug. 27 in honor of her birthday. A delightful luncheon was served and a pleasant time enjoyed by those present who were: The Misses Eva and Lizzie Stetler, Mr. and Mrs. Louis Amann and daughters, Ethel and Ruth and Miss Carrie Mattes of Chicago and Mrs. Marie Shevlin, Mrs. John Mattes, Mrs. J. R. Butler and daughter Mildred of Mokena.

The village water system was shut off for a few days this week, owing to trouble at the pumping station caused by a break in the pump. John Mathews of Joliet, well driller, was called, who pulled out the pipes and repaired the trouble.

The quarantine for scarlet fever at the home of Mrs. Rose Moriarty has been raised.

Mrs. Hodell underwent an operation for throat trouble at St. James hospital in Chicago Heights last Monday. She is doing nicely.

Friday evening a private meeting was held at the office of Ona E. McGovney at which Mr. Burton, of the Paton Realty Co., of Chicago, gave an illustrated talk on the boom of the Calumet region. He showed how this was going to be the largest steel and manufacturing district in the United States within the next few years. Over two million residents would live in that section within two years. Mr. Burton showed that now is the time to get in on the ground floor in buying property in the sub-divisions now being developed.

The Ford plants and other big industries are bound to create a boom all the way from Lake Calumet to Blue Island.

A number of Mokena people have purchased lots in the Calumet district for speculation purposes.

Prof. A. L. Brown of Marley was instrumental in getting Mr. Burton to come here and give the interesting facts on the Calumet district.

Karl E. Krapp, village clerk has received his supply of hunting licenses for the 1925-1926 hunting season and has sold quite a few as a starter.

Mr. and Mrs. E. P. Krapp and Mr. and Mrs. Karl Krapp and daughter motored to Momence Sunday.

Mrs. Harrower, former Mokena school teacher, visited at the E. P. Krapp home the past week.

The Ladies Aid of St. John Evangelical church will conduct a bakery sale in the church parlors Saturday afternoon.

W. A. Campbell and family of Salt Lake City, Utah who have been visiting at the Deadmore-Semmler home or several weeks, started on their return trip, Monday morning.

Mrs. Alex McMahan and daughter Lucille of New York City visited with her brother and family, W. A. Campbell, Sunday in Mokena.

The Mokena Men's Club had a very successful dance Saturday night selling 265 tickets. This club will give another dance on Labor Day evening. The Weissner Orchestra will furnish the music.

The former Mokena Camp Fire Girls held their annual reunion at the Cappel Grove Sunday. As a number of the members of the former organization are married, they and their families make a good sized gathering. Dinner was served under the trees. Toward evening they all went as guests of the Frank Valy family, to Brookwood Park at New Lenox. Here a wienie roast was enjoyed and supper served picnic fashion beneath the trees along the banks of Hickory creek. Boat rides on the creek were part of the pleasures of the day.

The entire day's activities were one round of pleasure to all participating.

FRANKFORT

Mrs. Henry Bock of Chicago Heights, formerly of Frankfort fell and broke her arm at the elbow while visiting with her son Steve, in Joliet last week. A year ago she broke the same arm near the shoulder. Mrs. Bock is over 80 years old. "Kidz" Girl's Club" had a picnic in Mrs. Fred Baumgartner's orchard last Friday afternoon. Sixteen girls were present. Games were played and a basket lunch with ice cream was enjoyed. This was the last meeting of the club before school opens.

Mrs. Sadie Widup and family of Plainfield who were visiting with the former's mother, Mrs. Minnie Dammann, have returned home.

Mr. and Mrs. Frank Kohlhaugen had as their guest the past week, daughter, Mrs. Olive Waggoner of Dewitt, Iowa.

Mrs. Elmer Erickson is ill. She is under the care of a Chicago doctor.

John Topp, section foreman on the Michigan Central had his arm broken at the wrist Monday noon when the motor car ran over it.

Three men from Minooka were

chased with much time and effort, with funds donated by parents or with money raised thru entertainments of various kinds.

I did not "insist", as your article states that I would take the credit of the school with me when left. I merely quoted the school law which can be found in "Standards For Recognized High Schools in Illinois," Circular No. 189, p. s. which states that all recognition and credit ceases when there is a change in the head of the school, and that this is a very serious matter, I am enclosing the article from the book and I shall appreciate you quoting it exactly in this place.

"Probationary recognition expires whenever there is a change in the head of the school. The loss of such a head in any system of the schools is always a serious matter, but is especially a serious matter in a school system having only a few teachers in the whole school system; he constitutes a vital part of the school system and his leaving may take its life or reduce its vitality to a low ebb—too low to warrant a continuance of the recognition. One of the first responsibilities of a new principal of a school with probationary recognition them is to apply for a renewal of the lost recognition and to take steps for conforming fully to the requirements for such renewal. A special blank for this application is furnished upon request by the office of the Superintendent of Public Instruction."

Therefore, in September 1925, when the High School opens, it will be without credit or recognition of any sort. That credit must be gained by the new principal sometime during the year, after his work has been examined in person by the State Supervisor of High Schools at Springfield—not by Cook County.

Again, I did not "insist" that it was thru my efforts that the school was graded highly. I merely quoted our highest state authority, Mr. John Calvin Hanna, State Supervisor of High Schools, who made that statement in several letters to me, some of which are filed in the County office, and publicly, when he introduced me as a speaker at the National Education Association which met in Chicago not long ago. You might be interested in reading a recent letter from him regard to my work in Orland which is dated July 1, 1925. I shall enclose a copy of the letter which I know the community will find of interest as well. I wish you would print it.

(cc used in next edition.)

The protracted dry spell is raising havoc with the corn crop. Sunday a light shower fell in this section, but not enough to lay the dust.

Mr. and Mrs. W. E. Houchin of Chicago spent Sunday with their aunt, Mrs. John Semmler.

Mrs. Emma Bechstein is visiting with relatives and friends in Iowa.

Mrs. Henry Schoeneck and son Walter, left Tuesday morning to spend a week at Three Rivers, Michigan.

Mr. and Mrs. Wm. Lynk are enjoying a camping trip in Wis.

Mr. and Mrs. Harvey Spiess and son motored to Michigan City, Ind. to visit with the John Groth family.

Miss Eva Groth returned with them

in Frankfort Monday to inspect the new public school building. They were very well pleased with the school and gave them many pointers before starting to erect the new Minooka public school.

The Misses Mildred and Dorothy Runge are visiting relatives in Plymouth, Wis.

Mr. Knight, the new principal of Frankfort public school moved here last week, having rented the house recently vacated by Clark Bennett.

School opened the past Monday, with the faculty as follows: Prin. Mr. Knight, 2nd. room, Miss Viola Lankenau and Miss Fair of Minooka teacher of the first room.

Mrs. Eichmeier has returned home from Chicago Heights, where she underwent an operation in St. James hospital a few weeks ago and has since been at her daughter's home, Mrs. Arthur Lambrecht.

Our old school building is a thing of the past. John Bettenhausen of Tinley Park who bought it has it all taken away.

Ray Warning had a fine display of Tractors, milking machines and washing machines at the Aurora Fair last week.

The Frankfort Fire department was called to the M. E. parsonage Saturday afternoon to extinguish a small blaze from burning papers and which got out of control. No damage was done except a bad scare.

Chas. Bobzin while driving the Crystal Oil truck Monday, tipped over near Mokena. He escaped injury and only slight damage to the truck.

The new M. E. parsonage is well under way. The frame is all up and will soon be ready for lathing.

Arthur Lambrecht, Chas. Pfeiffer, Ed. Haake, Walter Voss and Wm. Kampe played with the Ashler band Sunday at Crown Point for the Auto races.

Mrs. Fred Kohlhaugen bookkeeper at the Citizen State bank is enjoying a vacation.

Mr. and Mrs. Henry Ross were pleasantly surprised Aug. 20th, when the congregation of the First M. E. church and their children came to help them celebrate their 60th wedding anniversary.

The Second M. E. church which has been enlarged and remodeled will be dedicated Sunday Sept. 13. A fine program is being prepared.

Mrs. Fred and Mrs. Ray Warning attended a banquet and garden jubilee of the Eastern Star of Plainfield last Tuesday evening.

The Ashler and Frankfort band will play at Oak Forest Sept. 13th.

Miss Margaret Schroeder and Emma Weichbood left Tuesday to attend a Sunday School convention at Grant Park.

MARLEY NEWS

The Young Peoples' Club of the Marley church will present a home talent play entitled, "Fun on the Podunk Limited", Friday evening at 8 o'clock September 4th. The place of the play is staged in the interior of a Railroad train.

Cast of characters are as follows: Farmer Boggs—Ralph Bell; Mrs. Boggs—Bessie Sproat; Mary Boggs—Florence Cutler; Tommy Boggs—Wilson Gillette; Grandpa Wiggins—Harry Sproat; Grandma Wiggins—Miss Agnes Haley; Miss Prim—Evelyn Marshall; Susie Olson—Gladys Nelson; Conductor—Francis Nelson; Woman with baby—Hazel Cutler; Mrs. Herby—Miss Anna Storm; Mrs. Deafly—Dorothy Tilsy; Chinaman—Robert Gillette; News boy—Alvin Nelson; Mrs. Stutterly—Helen Frazer; Fat man—Edward Sproat; Porter—Everett Bell; Bride—Dorothy Frazer; Bride groom—Harley Gillette; Suffragist—Miss Carrie Kase; Marguerite—Iva Gillette; Irish woman—Miss Zula Withrow; Miss High Style—Miss Alice Haley; Musicians—Local talents.

Other numbers on the program will be instrumental music by Miss Blanche Dale of Homer and the Meyers Trio of Lockport. Vocal solos by Orville Sipple of Joliet.

Following the program a social hour will be held in the parlors of the church where the Marley Junior club will sell ice cream and cake under the supervision of Miss Caroline Tilsy. The public is invited and the proceeds of the entertainment will be used for church work.

The Hadley Cemetery northwest of Marley was given a general cleaning up Tuesday. About 20 persons were present helping. A pot luck picnic dinner was served at noon. In the afternoon a short business meeting was held and plans were made to gravel the driveway of the cemetery, to move the cemetery building and otherwise improve the grounds.

A subscription paper was launched at this time to solicit material for a repair fund for the cemetery. A

house to house canvass will be started this week by C. F. Haley, manager of the cemetery assisted by other members of the board.

The official board of the Hadley Cemetery for this year is as follows: President—Chas. W. Lahmann, Vice pres. James D. Bell, Manager C. F. Haley, Secretary and Treasurer, Miss Minnie Handorf.

Work of graving the lane up to the cemetery was commenced last week and a group of men are hauling the gravel from a new pit recently discovered on the Fred Blodgett farm.

The Hadley cemetery is one of the oldest cemeteries in this section containing the graves of many an old pioneer whose graves are without caretakers. A special appeal is being made to everyone who is at all interested in the cemetery, to help by donations and work, to make this cemetery a credit to the community, as so many of the older country cemeteries are neglected, and as has been said—"If you wish to know what kind of people live in a community, visit their cemeteries."

Miss Carrie Tilsy, teacher of the Lanier school, district 129, received word this week from August Maue, County superintendent of schools, that her school, is one of the ten schools in Will County to receive an attendance banner for the year 1924-1925. The banner will be awarded at the Teachers Conference on Thursday Sept. 3rd., at the Joliet High school.

Miss Gladys Nelson and Alvin Nelson spent a few days last week at the home of the former's grand parents, Mr. and Mrs. Wm. Long, in Walnut Hill, Ill.

Mr. and Mrs. W. J. Cleveland, daughters, Hazel and Bernice of Martin, Mich., visited with relatives and old friends in this section last week.

G. Willard Bush resumed his duties at the Joliet Prison Monday following a few weeks absence by undergoing an operation for the removal of a goitre.

Miss Helen Tilsy who has been a student at the Teachers Training college at DeKalb, Ill., for 12 weeks returned home Friday.

What Seemed Humorous

Mother was entertaining a caller, when suddenly Dorothy, who had been playing on the floor, yawned prodigiously. "My, what a big yawn for such a little girl!" exclaimed the caller. "Yes," agreed Dorothy, "and the funny part is that I wasn't listening at all to what you were saying!"

Great "Third Estate"

The "Third Estate" in French history was that part of the nation that belonged neither to the nobility nor the clergy; in other words, the common people who finally brought about the great revolution.

Include Complete Wiring in Your Plans

When you are building a home and looking forward to enjoyment of its comforts, you cannot omit providing for the fullest measure of electrical convenience.

It is infinitely better to put in all your wiring at the time of building your house than it is to do so after the house is finished. So make sure that your plans call for complete wiring. That's the economical and practical way to do.

We Will Help You

Without charge to you we will go over your plans and submit estimate of what proper wiring, insuring you fullest electrical convenience, will cost.

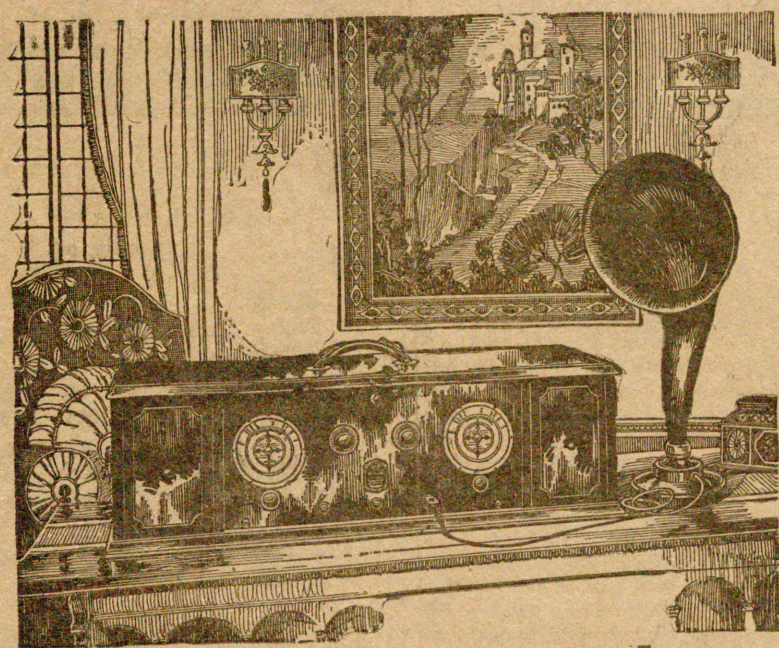

Or you can obtain estimate from any electrical contractor.

VILLAGE ORDINANCE NO. 287

An ordinance for the levying and collecting of taxes for the Village of Mokena, in the County of Will and State of Illinois, for the current fiscal year, A. D. 1925.

Be it Ordained by the President and Board of Trustees of the Village of Mokena, County of Will and State of Illinois, as follows:

Section 1. The sum of Forty-seven Hundred (4700) Dollars be and the same is hereby assessed and levied upon and against all real and personal property within the limits of the said Village of Mokena subject to taxation, according to the value of said property as the same is assessed and equalized for State and County purposes for the current year.

Said taxes hereby levied being for the current fiscal year of said Village of Mokena commencing July 1, A. D. 1925, and to be applied in liquidation of the appropriation made for said fiscal year for Village purposes. Said sum of Forty-seven Hundred (4700) Dollars being levied and assessed for the following purposes, to-wit:

Redemption of Water Works Improvement Bond No. 1	\$500.00
Redemption of Street Improvement Indebtedness Bond No. 2	500.00
Interest on Water Works Improvement Bonds	150.00
Interest on Corporate Indebtedness Bonds	75.00
Interest on Street Improvement Indebtedness Bonds	125.00
Salaries	400.00
Police & Fire Dept.	300.00
Lighting	1200.00
Building & Repairing Fund	250.00
Streets and Sidewalks	500.00
Oiling of Streets	500.00
Contingent Fund	200.00
Total	\$4700.00

Section 2. That there are hereby certified to the County Clerk of Will County, Illinois, the several sums stated as aforesaid and the total of said stated amounts, to-wit: Forty-seven Hundred (4700) Dollars for Village purposes, which said sums the Village of Mokena requires to be raised by taxation as aforesaid for the current fiscal year of said Village of Mokena commencing July 1, A. D. 1925, and for the purposes hereinbefore stated and the Village Clerk of said Village of Mokena is hereby directed to file with the County Clerk of said Will County and State of Illinois, on or before the third Tuesday in September, A. D. 1925, a copy of this ordinance duly certified by said Village Clerk under the corporate seal of said Village.

Section 3. This ordinance shall be in full force and effect from and after its passage, approval and publication according to law.

Section 4. All ordinances or parts of ordinances in conflict herewith or any section hereof are hereby repealed.

Passed this 28th day of August, A. D. 1925.

KARL E. KRAPP,
Village Clerk.

I hereby approve the above and foregoing ordinance this 28th day of August, A. D. 1925.

GEO. J. HACKER,
President of the Board of Trustees

KARL E. KRAPP,
Village Clerk.

ORLAND

A son was born to Mr. and Mrs. Harvey Boley last Friday morning.

Mr. and Mrs. Manny Schussler are the parents of a 10½ pound daughter who arrived at Burnside hospital, Chicago on Tuesday, August 25th.

Rev. J. J. Moor and son of Columbus, Wis., visited at the Edgar Cooper home last Friday.

Master Stanley Cooper, son of Mr. and Mrs. Chas. Cooper, had his tonsils removed by Dr. Hedges at the Silver Cross hospital, Joliet, on last Saturday.

The following Orland people went to Aurora to the Fair last Wednesday: Mr. and Mrs. Tom Cooper, Mr. and Mrs. Chas. Cooper, Mrs. Steve Sayers, Mr. and Mrs. Harvey Cooper, Mr. and Mrs. Oscar Strand, Mr. and Mrs. Arthur Beagley, Mr. and Mrs. Alfred Schilling, Mr. Howard Cooper, Mrs. R. G. Myrick, Miss Clara Myrick and Foster Myrick.

Alex Briggs who was injured by his tractor last week, is getting along nicely.

Mrs. R. J. Myrick visited at the home of her uncle, Mr. John McGregor at Morocco, Indiana this week. Mr. McGregor has been very ill recently.

Mrs. Edgar Cooper, Mrs. K. Brandean, Miss Pearl Cooper and Mr. Harold Moor went to Chicago last Thursday to see "The Ten Commandments" at the Woodlawn Theatre.

Misses Lois Ludwig, Ethelyn and Evelyn Mahaffay, Hazel Rust, Hazel Schmaedke, Hazel Kettering, Pearl Cooper Clara Myrick and Irene Mitchell, and Mr. Earl Sayers and Mr. Charles Mahaffay went on a lake trip to Michigan City last Tuesday and also attended the show at the Roosevelt Theatre on their return to Chicago that evening.

The following relatives and friends were guests at the home of Mr. and Mrs. Thomas Cooper last Sunday in honor of the christening of their baby daughter, Eleanor

PROBATE NOTICE

Estate of John Videtich, deceased.

The undersigned having been appointed Administrator of the estate of John Videtich late of Joliet, in the county of Will and State of Illinois, deceased, hereby gives notice that he will appear before the Probate Court of Will County, at the Court House in Joliet, at the October Term, on the first Monday in October next (being the fifth day of said month), at which time all persons having claims against said estate are notified and requested to attend for the purpose of having the same adjusted. All persons indebted to said estate are requested to make immediate payment to the undersigned.

Dated this 19th day of August, A. D. 1925.

JOHN TEZAK,
Administrator as aforesaid.
Albert H. Krusemark,
Attorney

copy of an ordinance of said Village being an ordinance for the levying and collecting of taxes for the Village of Mokena, in the County of Will and State of Illinois, for the current fiscal year, A. D. 1925, passed at a meeting of the President and Board of Trustees of said Village of Mokena held on the 28th day of August, A. D. 1925.

In Testimony Whereof, I have hereunto set my hand and affixed the corporate seal of said Village of Mokena the 28th day of August, A. D. 1925.

May: Mr. and Mrs. Geo. Brandau and family, and Mrs. Catherina Brandau, all of Frankfort, Mr. and Mrs. Adolph Ullrich and family and Mr. Adam Heisner, all of Green Garden, Mr. and Mrs. Edgar Cooper, Miss Pearl Cooper, Mr. and Mrs. Harry Cooper, Mr. and Mrs. Chas. Cooper and son Stanley and Rev. and Mrs. M. S. Collins and little daughter Eleanor Doris.

The sons and daughters of Mr. and Mrs. Benjamin Sayers gathered at the Sayers home last Sunday in honor of the 74th birthday of Mr. Sayers. His many friends join in wishing him health and happiness for many more milestones on the road of life.

ORLAND M. E. CHURCH NOTES

The picture for Friday, Sept. 11 Jack Pickford in his entertaining comedy drama "Waking Up the Town". For Sunday, Sept. 13th the sermon will be on "Paul, the Christian", illustrated with a very interesting picture showing the city of Damascus.

Eleanor May Cooper the 3½ months old daughter of Mr. and Mrs. Thomas Cooper, was baptised at the service last Sunday morning. Opportunity will be given next Sunday at the services for baptism or joining the church.

There was a good attendance at the Ladies' Guild meeting at the home of Mrs. Lawrence Uthe on Thursday of last week. The time was occupied with making articles for the bazaar to be held Oct. 14. At the business meeting the President, Mrs. James E. Creer, read the list of committees which will have charge of the various features at the bazaar. A special meeting of the Guild will be held in three weeks on September 17th at the home of Mrs. George Cox.

Prospects Bright for Better Horses

Both farm and city are demanding more and better horses, according to the Sears-Roebuck Agricultural Foundation.

Despite the 15,281,295 automobiles and trucks in the United States, there are 18,263,000 head of horses and mules on farms today and 2,300,000 horses pulling loads in city streets. The coming of the auto and trucks reduced the equine workers in cities by 2,000,000 between 1910 and 1920, a reduction of 39 per cent. But during the last three years there has been a decided trend in the opposite direction.

Between 1910 and 1920 the horse population on farms decreased 10 per cent. On January 1, 1924, there was 18,263,000 horses, compared with 21,555,000 six years before. This was the smallest number since 1905. Still, 97 per cent of all field work is done by horses and mules.

Around 1915, under the influence of stimulated war production and replacement by mechanical power, horse prices began to decline. By January of this year average values per head were the lowest since 1903. Mule prices, unlike horses, advanced during the war, reaching their peak in 1920. In 1923 there was a third more horses and mules sold than during the previous year.

Good mares and stallions are scarce. During the war horse breeding languished. The number of colts produced failed to keep pace with the losses by death. Between 1910 and 1920 horse and mule colts combined decreased 22 per cent. The largest percentage of the horse population is old.

Low prices will continue to discourage horse and mule production and cause still further decrease in the population until the average price turns upward. Unless breeding operations are increased, demand will soon be greater than the supply. How soon the market turning point will be reached for the rank and file of horses is uncertain. Prices have already improved for the better than medium grades. The constantly increasing demand along with the limited supply is indicative that the turning point is not far off.

Champion Wrestler Tells What to Eat

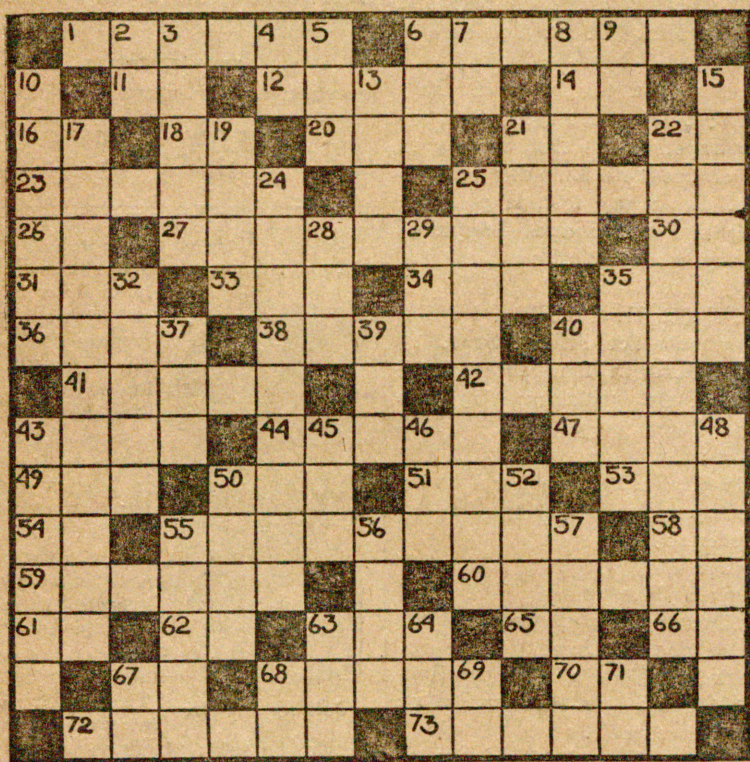

Johnny Meyers.

Johnny Meyers, middleweight wrestling champion of the world, is strongly in favor of the use of scientifically prepared foods. He prefers to know that the food he is eating is pure and wholesome rather than to take a chance with any kind of food poisoning by eating food from an unknown source. In a recent interview on the eve of his match with Lou Talaber, from whom he won his crown, he said: "I expect to win the crown from Talaber. He is a fine wrestler and uses more science than any man of the mat today. However, I feel sure that my superior physical condition will prevail and that I will emerge victorious and the champion of my division. Diet is a very important part of my program in training for a match. The system that I use is really very simple, involving only good judgment and caution in the selection of food. I prefer to eat scientifically prepared foods whenever possible and I never eat anything to which is attached the slightest doubt of its purity. I eat a great deal of canned foods because I am sure that they are pure and will have no ill effects on my digestive system. Take, just as an example of what food can do for the body—milk. It is the greatest of body builders and a very important part of any man's diet. But is sometimes impure or contaminated and may be the source of illness if used. Because of this fact, I use evaporated milk entirely and find it very satisfactory. I know that it is pure and that I will not suffer from its use. I know that it is a great body builder because the concentration of it gives it such food value. I know that it is easily digested, more so than market milk, in fact, because I drink it before going to bed and feel no effects of it in the morning. This is usually hard to do with ordinary market milk. This plan, in substance, is the same one that I use regarding other foods. If there is any chance or suspicion of impurity or low food value, I use something else.

"And if a man is so situated that it is impossible for him to get the proper amount of exercise, he must be doubly cautious not to partake of any but the purest food. On the whole, if a man eats with wisdom and observes the fundamental rules for good health, there is no reason why he should ever have a sick or uncomfortable day."

Weak Humanity

It is as difficult to get a man to admit that he snores as it is to get a woman to admit her age.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

NURSERY RHYME
PUZZLE

"BOW-wow-wow,"
"Whose dog art thou?"
"I'm my little master's dog,
Bow-wow-wow;
And I'd like a bite of cookie
Now-wow-wow."

Find two other boys. Upper left hand corner down, along head and shoulder. Upper left corner down, along leg.

The Great
WorkerBy REV. JOHN C. PAGE
Teacher of Bible Doctrine, Moody
Bible Institute, Chicago.

TEXT—It is God which worketh in you both to will and to work for His good pleasure.—Philipp. 2:13 R. V.

It is an old and true saying that every effect demands an adequate cause. Transformation of life from sin to holiness is an effect. The change involved is described in such terms as passing "from darkness to light," "from death to life" and from judgment into the place where there is "no condemnation." Such a change and such an effect demand an adequate cause. The cause is revealed in our text. It is God which worketh in you, it is God which worketh in you both to will and to work for His good pleasure. Not a string of maxims, though each one be a pearl; not a set of rules, even including the "golden rule"; not panned principles even though they be diamond pointed; not any one of these or all of them put together, but God—"It is God which worketh." To stop at this place in our text would mean little. Nothing distinctively Christian comes into view, but add the next two words, "It is God which worketh in you," then indeed we are in the midst of profound Christian truth even though it be stated so simply.

Rev. John C. Page.

The Nature of the Divine operation may be seen in the word "worketh" which implies activity, might and effectiveness. The divine power brings to pass whatever the divine will determines. This same word is constantly applied to the divine operations in the soul. There are various manifestations of the divine activity but "It is the same God which worketh in all." Various spiritual gifts are imparted to the people of God "but all these worketh that one and the same Spirit." God is the great worker—"It is God that worketh in you." The gifts that made both Peter and Paul effective and successful, each in his own sphere, are referred to in Galatians 2:8, in the words "He that wrought effectually in Peter was mighty in me."

The Sphere of the divine activity is indicated by the words "in you," that is, the children of God who are here addressed. In them there is a new nature. They have been born again and are new creatures in Christ Jesus. God by His Spirit now dwells and works within them. Divine indwelling is limited to the children of God, the recipients of the new life in Christ. In the unregenerated life the Spirit of God cannot abide. Like the dove sent out from the ark, he finds no abiding place in that which is corrupt and under judgment, but in the new sphere, that is, the sphere of resurrection life in Christ which has emerged from judgment, in that sphere, God the Spirit can dwell. This is precisely the place occupied by Christians to whom it is written "that like as Christ was raised from the dead by the glory of the Father, even so we, having been raised with Him should also walk in newness of life." To all such the apostle writes "Your body is the temple of the Holy Ghost which is in you" and again, "It is God that worketh in you." He began that work when the soul, illuminated by grace, said "Other refuge have I none, hangs my helpless soul on Thee." The good work which then began, God will continue until the day of Jesus Christ.

The Purpose of the divine indwelling and operation appears in the remaining words of our text, "He worketh in you to will and to work for His good pleasure." Disposition of heart and purpose of will are all of Him. There is no exaggeration in the words of the hymn that we frequently sing:

"And every virtue we possess,
And every conquest won,
And every thought of holiness
Are His alone."
All glory belongs to the great Worker.

Our Brother's Keeper

We are solemnly obligated to give the truth to others. That is good evangelistic and missionary doctrine. Jesus did not tell us to retire to some quiet place and keep still. He said: "Go ye into all the world and teach the glad tidings to every creature." In our church and in every church there is need of a mighty revival of personal evangelism. We are our brother's keeper. We are responsible for the welfare of his soul. To keep back good news from him is sinful. We can get very definite results if we go after them. We can win souls to Christ if we seek them.—United Presbyterian.

Sticking Steadily to It

John did the thing he was asked to do. He began, and kept on, and he finished it up. He tied a knot on the end of a thread. It's good to begin; it's better to keep undiscouragedly going; it's best to stick it out to the end, regardless of difficulties. Starters are plenty, but stickers are scarce, and finishers are scarcer. Let's stick it out on the thing we are doing for Jesus, prayerfully and singingly.—J. H. Jowett.

Lesson for September 6

PAUL WRITES TO THE
PHILIPPIANS.

LESSON TEXT—Phil. 2:7-16; 4:8.
GOLDEN TEXT—"I can do all things through Christ which strengtheneth me."—Phil. 4:13.

PRIMARY TOPIC—Paul and His Friends.
JUNIOR TOPIC—Paul Pressing Toward the Goal.
INTERMEDIATE AND SENIOR TOPIC—Choosing the Best Things.
YOUNG PEOPLE AND ADULT TOPIC—The Christian's Goal.

The contents of the epistle may be summarized as follows:

1. Salutation (1:1-2).
2. Thanksgiving and prayer in which he shows his loving interest in them (1:3-11).
3. Triumph of the gospel in spite of opposition (1:12-26).
4. Duties enjoined (1:27-2:18).
5. Paul's promise to send Timothy and Epaphroditus (2:19-30).
6. Exhortations and warnings (3:1-4:1).
7. Renewed appeal for unity (4:2-9).
8. Personal matters (4:10-23).

The essential message of Philippians is a revelation of the mind which should dominate the Christian.

1. All Things Loss for Christ (3:7-9).
The occasion for this remarkable declaration was the claim of the Judaizing teachers for legal righteousness. In chapter 3:4-6 he enumerates the grounds upon which he had a right to base his claims for legal righteousness.

1. "Circumcised the eighth day," in keeping with the demands of the law.
2. "Of the stock of Israel," related by blood and birth.
3. "Tribe of Benjamin," from which the first king was chosen, and which always remained loyal to the nation.
4. "An Hebrew of the Hebrews," in contrast with some of mixed parentage.
5. "Touching the law, a Pharisee," the sect most zealous for the ritual of Judaism.
6. "Concerning zeal, persecuting the church," A passionate effort to crush the church.
7. "Touching the righteousness which is in the law, blameless," as to the condition of life demanded by the law.

All of these, valuable in themselves, when placed alongside of the excellency of the knowledge of Christ were abandoned for a better thing. The vision of Christ gave him the true perspective of values. In this light he saw the utter worthlessness of these things. After some thirty years of such trials and sufferings as perhaps no other human being ever knew, he has no regrets, and still counts them as refuse in comparison with what he had gained in Christ.

11. Paul's Present Desire (vv. 10-11).
1. "That I May Know Him."
Personal acquaintance with the Lord was his supreme desire. To know the saving grace of Christ is good, but to know Christ is infinitely better.

2. "The Power of His Resurrection."
This is an advance thought over personal acquaintance. It is the expression of the life of Christ through the apostle. It is the power you gain to overcome, the mastery over sin and self.

3. "Fellowship of His Sufferings."
Not only identified with Christ in His sufferings by imputation, but that he might fill up that which is behind of the afflictions of Christ (Col. 1:24).
4. "Attain Unto the Resurrection of the Dead" (v. 11).
This will be accomplished when the Lord comes (I Thess. 4:16-17).

111. Pressing Toward the Goal (vv. 12-16).
Paul clearly grasped the meaning of his perfection in Christ, yet he was keenly conscious of his personal limitations. Herein is expressed the true law of progress in the spiritual life.

1. Conscious of Limitations (v. 12).
The first step towards progress is to be profoundly dissatisfied with personal attainments. No intellectual advancement is ever made by those who think they know enough, who are satisfied with what they have.

2. Conscious of a Transcendent Goal (v. 13).
The Christian life is an upward calling.
3. A Resolute Determination to Reach the Goal (v. 14).
He declares, "This one thing I do."
IV. The Right Occupation of the Mind (ch. 4:1-8).
The ideal controls the man. "As a man thinketh in his heart, so is he." When once the mind is guarded and controlled by the peace of God, it will dwell upon spiritual things.

Faith

"Every man may lose the sunshine for a time because of the clouds but happy is he if he still retains his faith."

The Good Shepherd

A good shepherd always looks after his ailing sheep.—Western Christian Advocate.

Teaches Mercy

"The religion of Jesus Christ alone teaches mercy."

HOW TO KEEP
WELLDR. FREDERICK R. GREEN
Editor of "HEALTH"KEEPING YOUR BATH-
TUB CLEAN

IS YOUR bathtub clean? This question would probably be regarded as a personal reflection by any good housekeeper. But everything is not clean that looks so, and Miss Katharine Hirsh and Miss Jean Broadhurst, two instructors in the teachers' college of Columbia university in New York, found this out when they began an investigation of bathtubs.

What constitutes cleanliness and what standard can be used for comparing one bathtub with another? Ordinary inspection would not do. Some means had to be found that was accurate and certain for determining whether one tub was clean as compared with another one. So the two investigators sought and found their standard through the help of bacteriology.

Bacteria Coli is the Latin name for a little germ or plant that is a very common inhabitant of the human intestines. Harmless itself, its presence shows that the object on which it is found has been contaminated with the bowel discharge of some previous occupant. Not very pleasant to think about in connection with bathtubs, is it? But it is much pleasanter to think about it than it is to be ignorant of it. So let's find out what that little plant told the two investigators.

They rubbed fresh sterile cotton swabs in three places on each tub, the outlet, the bottom and the sides where the "water line" comes. Each swab was then examined for bacterium coli. Out of 113 tubs, in 39, or 34.7 per cent, the bacterium coli was found.

Now this wasn't necessarily the fault of the housekeeper. It simply meant that the methods used had not been effective. So they began to experiment with various cleaning fluids, ammonia, kerosene, lime and different patent cleaning powders and fluids. They found that freshly made solution of chlorinated lime was the best.

A five-cent can of chlorinated lime, dissolved in a quart of water and kept in a tightly corked jar or bottle will last a week, no matter how many times the tub is used. If the tub cannot be kept clean, then, as the investigators point out in Nation's Health, a shower bath should be used instead of a tub.

X-RAYS FOR PLUMBERS

WHEN Professor Roentgen, working in his physical laboratory, discovered the mysterious and invisible light rays, scientific men all over the world realized that this discovery opened up a new field of knowledge. But the "practical" hard-headed business man, even if he noticed the announcement in the newspapers, said: "Some more of that useless scientific stuff that those research fellows are always busy on. All very well for a man who hasn't any better way to spend his time. But that sort of thing hasn't any practical value."

Naturally, the first application of this wonderful light was in the examination of the body following injuries. As the X-ray goes through the body about the same way that sunlight goes through a heavy, frosted pane of glass, surgeons were able to examine the bones in cases of accidents, and to see whether any bone in the body was injured. The bones, being harder and denser than the soft skin and muscles, naturally cast a heavy shadow, and any fracture or dislocation could be easily detected. Then methods were worked out by which any part of the body or any organ in the body could be examined and photographed and studied. So today an X-ray laboratory is as necessary and valuable part of a modern hospital as a drug room or an operating room.

So far, the efforts of scientists have been largely confined to learning how to use this new light for the benefit of the sick and injured. But its value in commercial and industrial life is now being recognized. The General Electric company, probably the largest manufacturers of electrical supplies in the world, has just completed the manufacture of a portable X-ray outfit for the use of plumbers, electricians, builders and others in locating water, sewer and gas pipes, electric light wires and beams in floors and walls. Instead of the large, expensive and heavy machinery heretofore needed for X-ray work, this is a little box weighing only 20 pounds and easily carried. It can be used in any position and will locate accurately the exact size and position of any metal object in a wall or floor, without any damage to the building. By its use, the locating of a water pipe, gas pipe or electric light conduit, is only the work of a few minutes.

Worth Remembering

Of every thousand marriages celebrated in London, 15 are between cousins.

Twenty more inches of rain fall every year in the west of England than in the east.

The forest of Argonne is famous as the scene of important military campaigns in 1792, 1870 and 1914.

There was 922,000 pounds of Limburger cheese in storage in the United States on the first of July, or nearly 200,000 pounds more than last year.

TINLEY PARK

Mr. Ladwig who has been staying with the Brandt family for sixteen years, died last Friday morning. He was a brother of the late Rev. Ladwig, former pastor of the Tinley Park German M. E. church.

Conrad Bettenhausen has purchased a corner lot from Mrs. C. Andres and is preparing to build a new bungalow. The old electric light power house is being converted into a garage.

A number of people from here attended the funeral of Violet Teske at Mokena Wednesday.

Wm. Stoehr and family of Minnesota are visiting at the Fred Werner home.

The Tinley Park school will open next Tuesday morning.

While Herman Siemsen was motoring from Cedar Lake late Saturday night he ran into a cow. Neither Mr. Siemsen nor the bovine were injured but the auto was damaged.

The Misses Lydia Pickton and Emma Greve of Milwaukee, Wis. are spending the last days of their vacation at the home of Rev. Wm. Greve.

Regular services with holy communion will be held next Sunday. The preparatory service begins at 9:30 a. m.

The school will begin its session on Tuesday, Sept. 8 and quite a few newcomers are expected.

The Ladies Aid Society meets on next Sunday afternoon at the church at 2 o'clock. The Young People's Society will meet Thursday night.

In spite of the heat last Sunday a fair attendance was present at the Mission festival. Both of the visiting pastors narrated some of their experiences in South America and China and the Rev. Schwartzkopf displayed a Chinese idol and a Chinese Bible and also read the Lord's Prayer and some Bible passages in Chinese.

MOKENA

Violet Teska, aged 13 years died Sunday evening following an attack of Flu. She has been ill the greater share of her short life. Funeral services were held Wednesday from the late home to the Lutheran church. Rev. Hering officiating. The floral offerings were beautiful and profuse. Special flower girls carried the flowers. Burial in Lutheran cemetery.

CARD OF THANKS

We wish to extend our sincere thanks to all our relatives, neighbors and friends for kindnesses and shown us during the death of our dear beloved daughter, Violet also those who donated their cars. And for the beautiful floral offerings. We especially thank Rev. Hennig for his comforting words. Signed Mr. and Mrs. August Werner and Family.

Mrs. Mary Marti entertained at her home Sunday: Dr. and Mrs. H. E. Rich, Mr. and Mrs. Nick Shark and son, Mr. and Mrs. Fred Grassle, Mr. and Mrs. I. Crute and son of Joliet, Mr. and Mrs. Geo. Thon, Mr. and Mrs. Laurence and daughters of Hammond, Ind., Mr. and Mrs. L. Goldberg and daughters, Miss Blanch Donnelly, Emil Seegers of Chicago and Henry Seegers of New York.

Miss Alda May Hotchkiss and Miss Clara Schafer of Matteson returned last week from the Dells of Wisconsin where they spent a delightful vacation.

Mrs. Ralph Stuellwagon was called to Oak Park by the sudden death of her uncle, Edwin Elliott Smeeth on Saturday August 29th. The funeral was held Tuesday Sept. 1, from his late home to Graceland cemetery.

Miss Dorothy and Hazel Arden who have been spending their vacation with their grandmother, Mrs. Mary Marti have returned to their home in Hyde Park.

Mr. and Mrs. Bert Fulton and children of Tinley Park spent Wednesday with Mr. and Mrs. Henry Martenson.

Mr. and Mrs. Henry Seegers who have been visiting friends and relatives here have returned to their home in New York. Mr. Seegers is a nephew of Mr. Martenson.
